DETAILED ACTION

1. This action is in response to applicant amendment received on 8/25/03.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 9-12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 9, it is not clear what “latch member is disposed.... peripherally with respect to said punch tool” encompasses. Figure 6 illustrates that the latch is disposed peripherally with respect to the punch driver and not to the punch tool.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-2 and 9-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Timp et al.

Timp discloses (Fig. 1-5) the invention including a punch element 14, a punch 12, a punch driver element 26, a latch 50, a spring 60 and a locking portion/cylindrical locking disk/plurality of axially extending cavities 70.

6. Claims 1 and 9-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Johnson et al.

Johnson discloses (Fig. 1-6) the invention including a punch element 10, a punch, a punch driver element 22, a latch 64a, a spring 64b, a locking portion/cylindrical locking disk (40 and 66), a punch guide 12 and a bore 65.

Allowable Subject Matter

7. Claims 3-5 are allowed.

Response to Arguments

8. Applicant's arguments do not comply with 37 CFR 1.111(c) because they do not clearly point out the patentable novelty which he or she thinks the claims present in view of the state of the art disclosed by the references cited or the objections made. Further, they do not show how the amendments avoid such references or objections.

In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., a latch that is at the periphery of the device) are not recited in the rejected claim 1. Although the claims are

interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

In response to applicant's argument that the latch has a sufficiently low mass and a spring has a sufficiently great spring constant as to prevent the latch from unintentional movement into an unlocked position, a recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim. In a claim drawn to a process of making, the intended use must result in a manipulative difference as compared to the prior art. See *In re Casey*, 152 USPQ 235 (CCPA 1967) and *In re Otto*, 136 USPQ 458, 459 (CCPA 1963).

Applicant argues that Johnson does not teach "a latch member to latch the punch element to the punch driver". However, Johnson teaches a latch member to latch the punch element to the punch driver through element 40.

Conclusion

9. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37

Art Unit: 3724

CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
